RYAN POWER

Web Developer

PHP

MySQL

PROFILE

I am a Full Stack Developer, just out of college with experience in ASP.Net, C#, MySQL, JavaScript and its libraries – PHP and Bootstrap.
I am a starting to learn Java on my own time. I love the ease of taking the code from one machine and running it on another and the fact that it is object-oriented only adds to its appeal. ASP.Net allows writing program logic in my choice of the language, letting me utilize my C# skills. HTML, the core of fundamental web programming happens to be one of my well-developed skills as well.

EXPERIENCE

Grivik Industries

2018-PRESENT
Running my own business building tech for cosplay. I primarily use Arduino and the Raspberry Pi so this has given me some experience with Python.

Server-Side Scripting

2017-2017
Students implement Microsoft's ASP.NET platform to design and create web sites that can Create, Read, Update, and Delete (CRUD) data from a database.

Relational Databases

2018-2018
Students are introduced to the process of planning, creating and managing a relational database using Structured Query Language (SQL) statements. Data manipulation and extraction are emphasized in this course.

SKILLS

- PHP
- HTML
- CSS
- MySQL
- JavaScript
- C#

EDUCATION

Georgian College
2016-2019

Nantyr Shores
2007-2011
